

P21745.A03

A1
the weight of paper sheet. Moisture sensors are used in, e.g., U.S. Patent Nos. 5,093,795 and 5,262,955, which measure the moisture content profile and adjust the moisture content by adding water or steam to the web, and in, e.g., U.S. Patent No. 5,286,348, which uses an infra red sensor on the web emerging from the last dryer in a papermaking machine.

REMARKS

The Examiner is respectfully requested to enter the foregoing amendment prior to examination of the above-identified patent application.

The present amendment has been made to address an obvious error of a typographical nature.

Should there be any questions, the Examiner is invited to contact the undersigned at the below listed number.

Respectfully submitted,
Andrew LILBURN
